Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 13 November 2007.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4,6,10,15-19,25-26 are rejected under 35 U.S.C. 102(b) as being anticipated by Stevens (5,078,722).

Stevens discloses in figures 1-2 , a device is used to cut tissue having the limitations as recited in the above listed claim, including: a housing 32, a shaft 10 extends from the housing to a distal end of the instrument, where the shaft has an opening 20 at the distal end, a guide tube 14 extends from the distal end , where a path is through the guide tube for extending a guidewire 16, where means for longitudinally cutting tissue that has a blade 52 extendable and retractable through the opening of the shaft, where the guide tube extends through the opening of the shaft beyond the distal end of the blade, when retracted to define a path along which the blade is extendable and retractable at best seen in fig. 1, and where the instrument further has a blade shuttle at 52a attached to the blade , and where the guidewire 16 extends along the path for extending the guidewire, and where the guide tube is stationary with the shaft, and where the blade has a sharp edge to allow the edge of the blade to cut tissue.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 5 and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Stevens (5,078,722) in view of Sauer et al (5,562,694). Stevens discloses the invention substantially as claimed. Stevens is silent regarding a pivotal actuator member at the housing with one or more rods.

Sauer discloses such a pivotal actuator member 118 at the housing with one or more rods 252,254 (figures 2-3).

It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify Stevens by making the device has a pivotal actuator member at the housing with one or more rods as taught by Sauer to allow prediction result of adding an additional actuator that would enhance the extension/retraction of the blade efficiently. As to claim 7, Sauer teaches the shaft is extendable through an endoscope 400.

Allowable Subject Matter

3. Claims 8-9 and 20-24 are allowed over the art of records.

Response to Arguments

4. Applicant's arguments with respect to claims 1 and 25 have been considered but are moot in view of the new ground(s) of rejection. Applicant is asked to please refer to the modified prior art rejection above where examiner address applicant's concerns regarding prior art rejection.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
